ENVIO | QA ASSESSMENT

1. Manual QA Challenge

(Assuming that PO or Business Analysis before prepared Product Analysis)

- Component of test plan-

Objective:
Goal of this project are:
- Assure that every person(end user) can easily use this application
- All of the calculations from this App must be true

In Scope:
- Functional testing
- Edge testing

Out of Scope:
- Non-Functional testing like(performance testing, Stress testing, load testing)
- Secure testing

Environment:
- Operating Systems

Tools:
- Project Management tools like(Jira, …)
- Defect Management tools like(Jira, Bugzilla,…)

Test Strategy:
- Smoke testing
- Regression testing
- Component testing
- UAT testing

Resources:
- Two QA

Roles and Responsibilities:
- One tester as a Lead QA
- One tester as a Junior member

Schedule:
- QA activities must be delivered in next Sprint(In 2 weeks)

Exit Parameters:
- 100% test coverage
- All manual test executed
- All bugs are fixed

(P.S. Normally Test plan is responsibility for Test Manager and we don't have any Test Cases in there, so I didn't write them.)
